Student Name	Mr. GNANA SEKAR P
Student Roll Number	910619106016
Maximum Marks	2 Marks

Question-1:

Build a python code. Assume u get temperature & humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

CODING :

```
import random
from time import *
print("*****")
flag=True
while(flag):
    temp = random.randint(0,50)
    humi = random.randint(10,50)
    if temp>45 and humi<30:
        print("Ambient Temperature =",temp,"Ambient Humidity =",humi)
        print("ALARM ON")
        flag=False
    else:
        print("Ambient Temperature =",temp,"Ambient Humidity",humi)
        sleep(0.5);

print("*****")
```
