Getting started quickly

- Configuring your app**
- To connect services and DevOps toolchains to your app:
1. Use the **Services** card to connect a service to your app. Select an existing service instance, or create a new one. [Learn more.](#) [🔗](#)
  2. If you want to view the code before your app is deployed, click **Download code** to obtain the .zip file.
  3. Click **Deploy your app** in the **Deployment Automation** card to select the deployment target and configure the Continuous Delivery service. The deployment begins automatically.
  4. After the deployment begins, you can view the status of the deployment, modify your app, view your repo, or view the app's URL.
  5. If you make any changes to your app,
